WATANABE *S*line

WBG-410S

SUPER BIG 410 S LINE

*Seeking unacceptable risk to “0”*

“WATANABE S line” is “specialized in models for safety enhancement” which aims at risk reduction of food processing machinery use.

There is no “absolute safety” of food processing machinery use; however it is possible to reduce “Unacceptable risk”.

## COVER

### ● Blade cover

A safety sensor is attached to the blade cover. Without the cover, the machine will not run. In addition, the cover for the grinder mount also has a safety sensor, preventing unexpected machine operation. The blade has a better emergency stop mechanism, decreasing the likelihood of risks.

### ● Grinder cover

When sharpening the blade, the safety sensor detects whether or not the grinder is attached. If not, the machine will not operate.

## SAFETY CONTROL

### Double Control

Each cover has a safety sensor installed. Without the cover, the machine will not operate. Safety system “Double Control” is used to improve safety and reliability.

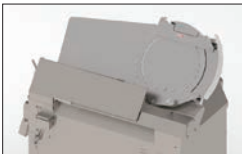

\*Compared to the proximity sensor, the safety sensor has higher reliability, and better fault detection.

## SANITATION

Using reliable technology, we have pursued the improvement of cleanliness. The machine is water washable, reducing the maintenance efforts.

## BLADE STOP

With our own deceleration system, the blade spinning time is reduced after turning off the machine.

## OPTION

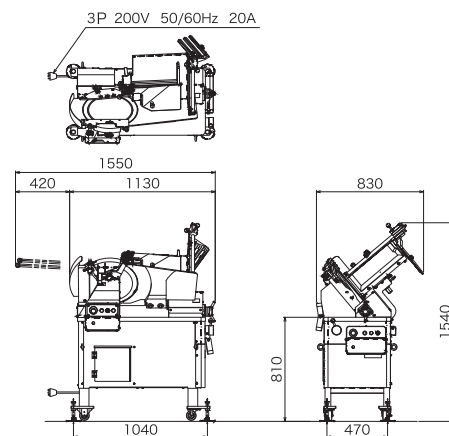

The magnetic blade cover is included as a standard feature. The blade removable type is there as an option. Washing the blade after detaching is possible.

## SPECIFICATION

DIMENSION	W1130*L830*H1540mm
WEIGHT	310kg
MAX. SLICE SIZE	W410*L222*H425mm
SLICE THICKNESS	0 ~ 30mm
CAPACITY	40 ~ 66 slices/min
SLICE TEMPERATURE	-6 ~ -2°C(Depends on product)
SLICE ANGLE	FIXED 0°
RATED ELECTRICITY	OUTPUT 1.5kW CURRENT 12.7A
RATED CONSUMPTION	0.98kW/0.98kW (50/60Hz w/o load)
POWER SUPPLY	3Phase 200V 50/60Hz More than 20A

Processing temperature is reference value. It is changed depends on products.  
Rated consumption is changed depends on the operation condition.  
Make sure there is enough space around the machine for maintenance/cleaning.

## DRAWING Please refer to the drawing for further information.

WATANABE S line is an upgraded model of safety features of WATANABE production, however there are not models to guarantee its safety in all of usage. Please use productions by following precautions and warning on the manual.  
In the interests of improvement, the specifications and appearance of the product are subject to change without notice.
